RE AFTER CORPORATIONS

After an absence of several days Mr.

J. W. Branning is at home.

Since Tuesday we have had some damp, disagreeable weather.

The comic drams, "A Scrap of Paper," was presented at Rea's Opera House last Thursday evening by home talent to a large and appreciative audience, with the cast as given below:

Raleigh, N. C., Jan. 14.—Representative Locke Craig has introduced in the House a bill which requires corporations desiring to do business in this State to pay a license-tax of \$500. At first it was \$1.000, but to-day he decided to make the figure \$500. The bill is intended to apply to railway and insurance companies. rance companies, and appears in a way to be a result of caucus action. Your Craig about this bill, and asked him its purpose. He said: "Its purpose is to prevent the removal to Federal SOME VALUABLE HINTS FOR THE Courts of causes by or against foreign corporations. The fee fixed by the bill is \$500, to be paid as a license fee by surgeon of the Rarlem Hospital Disdo you propose to prevent such removals of causes?" Craig replied: "This bill 'domesticates' the foreign corporations and thus prevents the removal causes to Federal Courts when the amount involved is \$2,000 or more, as now provided by the United States Senate."

The white State convict, Millard Moore, who, in this county, murdered Shaw, a guard, will be put on trial for his life next Thursday.

What might have been a severe attack of 'La Grippe,' and rapidly curling middent can be reasonable to the processor. In common with many of the profession, it had been my habit prior to my acquaintance with the stimulant non-depressant character of Phenalgia, to prescribe alcoholic stimulants when the free use of alcohol is always followed by great depression and reaction. The contrary is true of the coal-tar products, to depress the product of the paying these past due salaries, and says all the fusionists will then be discharged, and their places filled by Democrats.

The object of the bill is to force the taking out of North Carolina charters. The fact is it is almed more particularly at railways. Craig was asked if he did not think it would immensely increase "overhead" insurance, and said he supposed it would. He added that of course there would be no way of reaching companies which had no assets in North Carolina, but which did business here.

Representative Ray, of Macon, assured the negroes in the House that no bill would be passed giving all the white school-taxes to white schools, Craig, who is from the Asheville district, gives the same assurance, Julian, who introduced the bill to do this says if the proposition was submitted to the people in the shape of a constitutional amendment it would be ratified by a majority of at least 75,000. Another member tells me that many thousands of people in the country are tired of the negro schools, and do not care whether the negroes have any education or not.

Representative Ransom, of Mecklenburg, says that the sentiment among country people in the State is overwhelmingly that this Legislature ought to reduce salaries and fees. He says he believes this course will be taken.

The Legislature is being flooded with petitions for the creation of the county of "Scotland," out of the lower end, a little tess than half, of Richmond county. It is the fourth time a Legislature has been urged to take this step. There appears to be quite a strong sentiment against the creation of any new counties.

It is said that at the expiration of his term of office, Governor Russell will not return to his home at Wilmington, but will go to New York and engage in the practice of law. He is persona non gratat to the Wilmington Democrats,

Stand in front of a looking giass and close your left eye. Now place the first finger of your right hand over the representation of the closed eye on the glass. Now open the eye just closed and close the right eye, still keeping the finger in the same position on the glass. You have not moved your finger, but it will appear as if you have done so, for the finger which once covered the closed left eye is now covering the right eye.
